

- Rugged industrial quality
- Conduction/convection cooled - no fan
- Fully protected
- Field proven design

This rugged, industrial quality AC/DC power supply uses field-proven technology to generate the required output power. It is a mature product with a track record in numerous applications. The input accepts any AC voltage from 95V to 264Vac. Cooling is via baseplate to a heat-sinking surface and by natural convection. Low component count, large design headroom, and the use of components with established reliability result in a high MTBF.
