Inverter RS Smart Solar 48/6000

Off-Grid solar inverter

The Inverter RS Smart Solar 48/6000 is a 48 V 6 kVA Inverter. There are two 450 VDC 3 kWp PV inputs for a total of 6 kWp. It is used in off-grid solar applications where AC power is required.

Combination of an inverter, bi-directional DC-DC converter and MPPT

The inverter produces a perfect sine wave, able to supply high powered appliances. It is supplied by a bi-directional DC-DC converter, that can either charge the battery when excess solar power is available or convert from the battery when it is needed.

Wide MPPT voltage range

65 – 450 VDC, with a 120 VDC PV startup voltage.

Light weight, efficient and quiet

Thanks to high frequency technology and a new design this powerful inverter weighs only 11 kg. In addition to this it has an excellent efficiency, low standby power, and a very quiet operation.

Display and Bluetooth

The display reads battery, inverter and solar charge controller parameters. The same parameters can be accessed with a smartphone or other Bluetooth enabled device. In addition, Bluetooth can be used to set up the system and to change settings with VictronConnect.

VE.Can and VE.Direct port

VE.Can connection to a GX device for system monitoring, energy meter⁽¹⁰⁾, data logging, and remote firmware updates. VE.Direct connection to a GlobalLink 520 or 530 for remote data monitoring.

Built in PV isolator

Both parallel PV strings connected to the MC4 plugs can be safely isolated with the large built-in switch on the bottom of the unit.

I/O Connections

Programmable Relay, temperature sensor and voltage sensor connections. The remote input can also be configured to accept the Victron smallBMS.

VRM Portal

When the Inverter RS is connected to a GX device with internet connection, you can access our free remote monitoring website (VRM). This will display all your system data in a comprehensive graphical format. System settings can be changed remotely via the portal. Alarms can be received by email.

Inverter RS Smart Solar	48/6000
INVERTER	
DC Input voltage range	38 – 62 V ⁽⁶⁾
Output	Output voltage: 230 VAC ± 2 % Frequency: 50 Hz ± 0.1 % ⁽¹⁾ Maximum continuous inverter current: 25 Aac Increases linearly from 4800 W at 46 VDC to 5300 W at 52 VDC
Continuous output power at 25 °C	4500 W
Continuous output power at 40 °C	4500 W
Continuous output power at 65 °C	3000 W
Peak power	9 kW for 3 seconds 7 kW for 4 minutes
Short-circuit output current	45 A
Maximum efficiency	96.5 % at 1 kW load 94 % at 5 kW load
Zero load power	20 W
Low Battery shutdown	37.2 V (adjustable)
Low Battery restart	43.6 V (adjustable)
SOLAR	
Maximum DC voltage	450 V
Start-up voltage	120 V
MPPT operating voltage range	65 – 450 V ⁽⁵⁾
Max operational PV input current	12 A ⁽⁴⁾
Max PV Short circuit current reverse polarity protection	16 A
Maximum DC solar charging power	6000 W total - 3000 W per tracker
Max PV short circuit current (Isc PV)	16 A
Earth leakage trip level	30 mA
Isolation fail level (detection before start-up)	100 kΩ
CHARGER	
Programmable Charger voltage range (VDC)	36 – 60 V ⁽⁷⁾
Charge voltage 'absorption' (VDC)	Default setting: 57,6 V (adjustable)
Charge voltage 'float' (VDC)	Default setting: 55,2 V (adjustable)
Maximum AC coupled solar charging power ⁽⁹⁾	5000 W
Maximum combined charger current	100 A ⁽⁸⁾
Battery temperature sensor	Included
Battery voltage sense	Yes
GENERAL	
Parallel and 3-phase operation	12 parallel units supported, 3 phase supports 4 units per phase
Programmable relay ⁽³⁾	Yes
Protection ⁽²⁾	a - g
Data Communications Ports	VE.Direct port and VE.Can port (**)
Bluetooth frequency	2402 – 2480 MHz
Bluetooth power	4dBm
General purpose analogue/digital in port	Yes, 2x
Remote on-off	Yes
Operating temperature range	-40 to +65 °C (fan assisted cooling)
Maximum altitude	2000 m
Humidity (non-condensing)	max 95 %
ENCLOSURE	
Material & Colour	steel, blue RAL 5012
Protection category	IP21 Protective Class: I
Battery-connection	M8 bolts
230 VAC-connection	Screw terminals 10 mm ² (6 AWG)
Weight	11 kg
Dimensions (h x w x d)	425 x 440 x 125 mm
STANDARDS	
Safety	EN-IEC 60335-1, EN-IEC 60335-2-29, EN-IEC 62109-1, EN-IEC 62109-2
Overvoltage category	Battery: OVC I, PV port: OVC II, AC out: OVC II
Emission, Immunity	EN 55014-1, EN 55014-2 EN-IEC 61000-3-2, EN-IEC 61000-3-3 IEC 61000-6-1, IEC 61000-6-2, IEC 61000-6-3, Pollution degree 2

- 1) Can be adjusted to 60 Hz.
- 2) Protection key: a) output short circuit b) overload c) battery voltage too high d) battery voltage too low e) temperature too high f) 230 VAC on inverter output g) Solar earth leakage.
- 3) Programmable relay which can be set for general alarm, DC under voltage or genset start/stop function. DC rating: 4 A up to 35 VDC and 1 A up to 70 VDC.
- 4) Normal operation is regulated to 12 A, with maximum reverse polarity protection 16 A.
- 5) MPPT operating range is also constrained by battery voltage - PV VOC should not exceed 8x battery float voltage, e.g. a 50V battery voltage maximum should have 400 V maximum PV array - see product manual for further information.
- 6) Minimum start-up voltage is 41 V. Inverter shutdown can be set as low as 32 VDC, but may shut down on low AC output voltage (due to load). Over-voltage disconnect is 65.5 V.
- 7) The Charger set-point (float and absorption) can be set to max 60 V. The output voltage at the charger terminals can be higher, due to temperature compensation as well as compensation for voltage drop over the battery cables. The maximum output current is reduced on a linear basis from full current at 60 V to 5 A at 62 V. The equalization voltage can be set to max 62 V, the equalization current percentage can be set to max 6 %.
- 8) Maximum charging current from AC and DC sources varies with AC and DC voltages. See product manual for more detailed limitation specifications due to these variables.
- 9) AC coupled solar charging requires an external PV inverter to be connected on a circuit at the AC output of the Inverter RS Solar.
- ** Note only the VE.Can port can be used for connection to a GX device. The VE.Direct port supports the GlobalLink 520.
- 10) Connectivity to the Victron VM-3P75CT energy meter must be made via VE.Can, Ethernet connectivity is not currently supported.
